

BUREAU VERITAS

Oil & Petrochemicals

Pipelines & Storage

Expert Analytical Services for
Pipeline & Terminal Operators

BUREAU
VERITAS

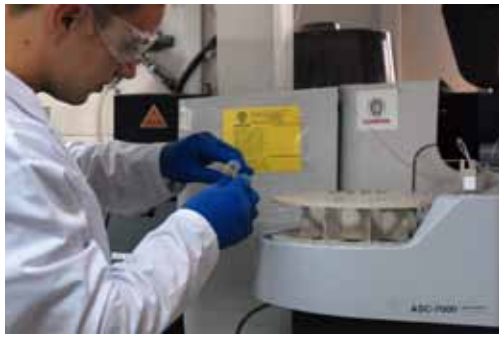

Pipelines & Storage

Contamination during the transport and storage of Oil & Petrochemical products is costly and disruptive to a company. At every step in the process cross-contamination and impurities can occur. The presence of water and microbiological matter can result in corrosion, blockage, health and safety risks and off-specification products.

Bureau Veritas supports operators guaranteeing the quality of products at various points in transit. Our global laboratory network is fully equipped to support our customers with sampling, logistics, fast turnaround testing and reporting.

We conduct field sampling at any point along the pipeline and at the terminal, with fast, accurate laboratory analysis conducted at our state-of-the-art testing facilities. Our expert teams ensure any potential issues are identified quickly and effectively, allowing customers to take remedial action if required. Bureau Veritas is your global provider for the sampling and testing of crude oil, petroleum refined products, kerosene, condensates, LNG, LPG and fuels.

Key Features	Customer Benefits
150 years of technical excellence in the Oil & Petrochemicals market	Your product expert for crude oil, petroleum refined products, kerosene, condensates, fuels, product advisory
Extensive global network of inspectors, surveyors and laboratories	Ability to test your fuels anywhere, any time
Precise, dependable and prompt reporting	Accurate results, the first time, every time
Independent testing results	Quality assurance executed to the highest standards, trusted by all parties
Personalized Account Management	Account manager will be your primary contact, regional teams available for direct communication 24/7

Testing & Analysis

Bureau Veritas laboratories offer analytical services with fast turnaround times on testing and reporting. We support our customers with specialised sampling and logistics arrangements.

Our laboratories are engaged in continuous improvement to ensure we consistently achieve best-practice in terms of accuracy, speed, traceability and efficiency.

Our global technical governance team monitors laboratory operations to ensure reliable, repeatable test results.

Key Capabilities

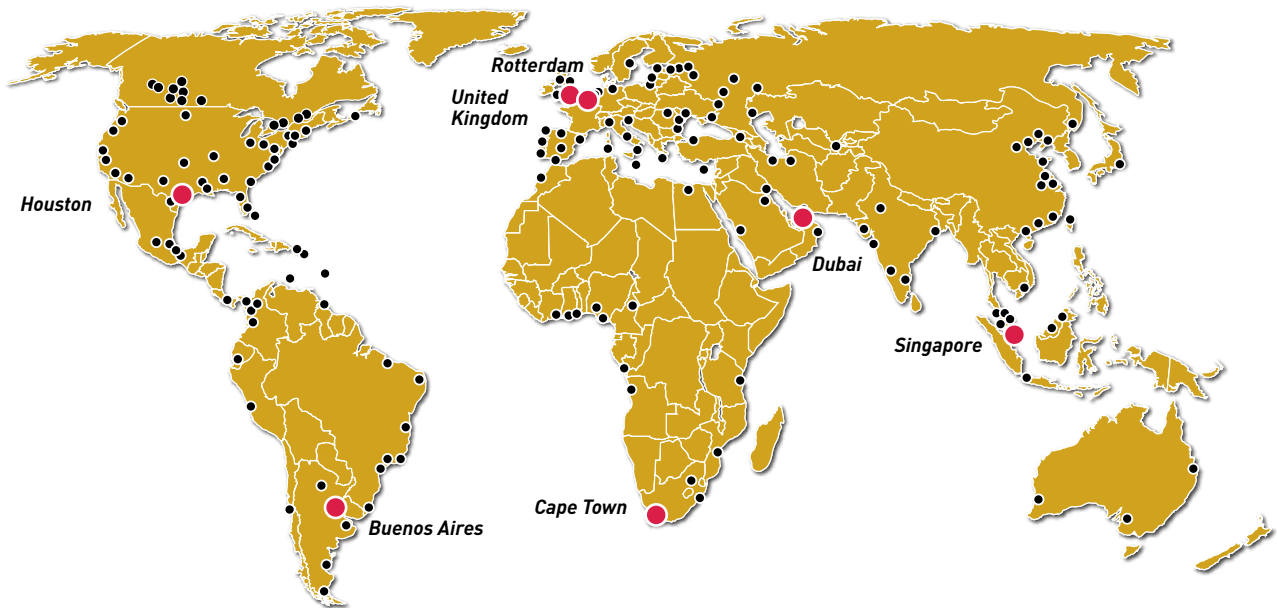

Chemicals	LPG
Condensates	Lubricants
Crude Oil	Microbiological Contamination
Diesel Fuel	Petroleum Refined Products
Jet Fuel & Kerosene	Water Contamination
LNG
