

Quick Start Guide

Moving Equipment Units to Different Worksites

○ Objectives:

- 1** Access the equipment tab
- 2** Learn how to move equipment units
- 3** Move equipment units to a different worksite

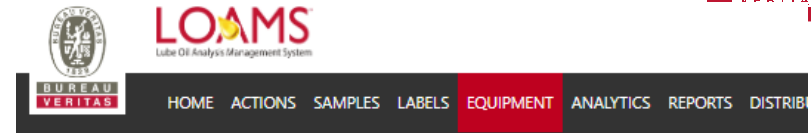

Moving Equipment Units

- Moving equipment units is possible by following 5 simple steps.

1 The first step to move a unit to a new worksite begins by clicking the equipment tab and then clicking the “Browse Equipment” tab.

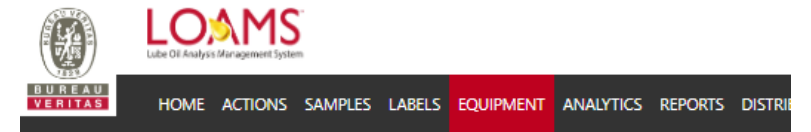

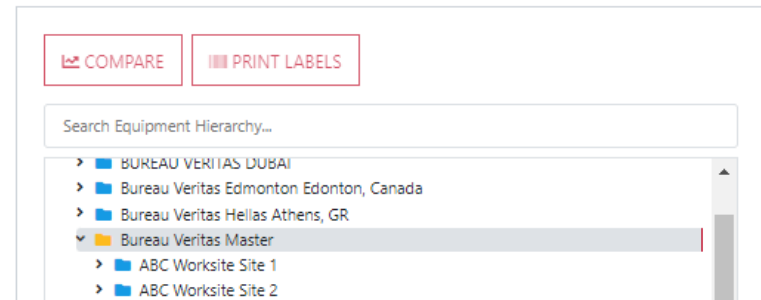

2 Click the master account folder  to open the browse tree hierarchy.

3 Now, click the worksites folder  to find the unit you plan to move.

Moving Equipment Units

4 After clicking the worksites folder, you'll see the customer information and unit details. Click on the unit you plan to move. This action will highlight the unit you have selected.

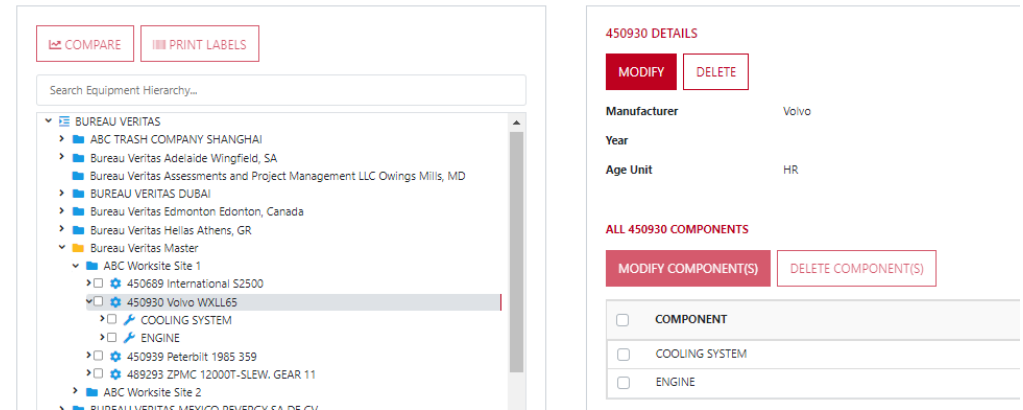

5 Once the unit is selected, hold click and drag the unit to the worksite folder you plan to move the unit into; release click when you have hovered the correct worksite folder. Once you have dropped the folder, the move unit window will appear. Click the **OK** button to confirm the unit move. You have successfully moved an equipment unit in LOAMS.

Please note, as you move a unit from one worksite to another, you'll notice that the worksite folder where you are moving a unit from will be highlighted in light blue. Also, as you hover to the worksite that you are moving your unit into, the worksites folder will highlighted in dark blue.
